Alkemy Capital Investments Plc

Brokers Visit World Class Wilton International

On Monday 30th May, Alkemy Capital Investments plc (“Alkemy”) and its wholly-owned subsidiary, Tees Valley Lithium Limited (“TVL”) hosted London brokers VSA Capital and Shard Capital on a visit to the world-class Wilton International Chemicals Park and the Teesside Port facilities.

The Wilton International Teesside Chemicals Park is one of the biggest in Europe and is host to Anglo American, SABIC, Alpec, Nippon Gas among others. Wilton are providing TVL with plug and play services including energy, development land, infrastructure, fibre, utilities and security at TVL’s 20-acre plot.

The visitors to TVL’s site at Wilton noted the access to chemicals reagent services and access to green renewable energy - including the planned direct wire link to the world’s biggest wind farm located at Dogger Bank.

The group were also hosted by PD Ports, one the UKs largest port operators who will provide logistic services including container handling. The PD Ports Teesport location is the nation’s fifth largest port and the UK’s northern gateway for international trade.

Over the past month, TVL have announced the release of their Class 4 Feasibility Study along with outstanding metallurgical testwork results for their high-purity battery-grade Lithium Hydroxide, validated by Cathode Active Material manufacturers.

Preparations are well advanced for activities on the ground to commence later in the year.

Tees Valley Lithium, CEO John Walker, commented:

“Tees Valley Lithium is moving fast towards establishing the world’s first independent and sustainable lithium hydroxide processing facility, here at the Wilton International Chemicals Park in Teesside UK. TVL, with the help of its partners, will be supplying the UK and Europe with 96,000tpa of battery-grade lithium hydroxide – the equivalent to 15% of European demand by 2030.”

NOTES TO EDITORS

Alkemy is seeking to develop, construct and operate the world's leading independent and sustainable lithium hydroxide production facility.

Alkemy, through its wholly-owned subsidiary Tees Valley Lithium, has secured a 9.6ha brownfields site at the Wilton International Chemical Park located in Teesside, a major UK Freeport.

Alkemy has completed a Class 4 Feasibility Study for its proposed lithium hydroxide facility which will process feedstock imported from various sources to produce 96,000 tonnes of a premium, low-carbon lithium hydroxide annually, representing around 15% of Europe's projected demand.

Forward Looking Statements

This news release contains forward-looking information. The statements are based on *reasonable assumptions and expectations of management and Alkemy provides no assurance that actual events will meet management's expectations. In certain cases, forward-looking information may be identified by such terms as "anticipates", "believes", "could", "estimates", "expects", "may", "shall", "will", or "would". Although Alkemy believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those projected. Mining exploration and development is an inherently risky business. In addition, factors that could cause actual events to differ materially from the forward-looking information stated herein include any factors which affect decisions to pursue mineral exploration on the relevant property and the ultimate exercise of option rights, which may include changes in market conditions, changes in metal prices, general economic and political conditions, environmental risks, and community and non-governmental actions. Such factors will also affect whether Alkemy will ultimately receive the benefits anticipated pursuant to relevant agreements. This list is not exhaustive of the factors that may affect any of the forward-looking statements. These and other factors should be considered carefully and readers should not place undue reliance on forward-looking information.*
